Company Knowledge Base

A synthetic enterprise knowledge base created specifically for the GraphRAG project. The document contains interconnected employees, departments, projects, technologies, managers, locations, and relationships.

1. Company Overview

AITech Solutions is a technology company headquartered in Chennai, India. The company develops artificial intelligence, cloud, data engineering, and enterprise software products. Its major departments are AI Research, Data Engineering, Cloud Platform, Product Engineering, and Cybersecurity.

2. Departments

Department	Location	Manager	Primary Focus
AI Research	Chennai	Ananya Sharma	Artificial Intelligence and machine learning
Data Engineering	Bengaluru	Rahul Mehta	Data pipelines and analytics infrastructure
Cloud Platform	Hyderabad	Vikram Rao	Cloud infrastructure and distributed systems
Product Engineering	Chennai	Meera Iyer	Enterprise applications and product development
Cybersecurity	Pune	Karan Singh	Security monitoring and application security

3. Employees

Employee	Role	Department	Location
Ananya Sharma	AI Research Lead	AI Research	Chennai
Rahul Mehta	Senior Data Engineer	Data Engineering	Bengaluru
Vikram Rao	Cloud Architect	Cloud Platform	Hyderabad
Meera Iyer	Product Manager	Product Engineering	Chennai
Karan Singh	Security Engineer	Cybersecurity	Pune
Priya Nair	Machine Learning Engineer	AI Research	Chennai
Arjun Patel	Data Engineer	Data Engineering	Bengaluru
Sneha Kapoor	Cloud Engineer	Cloud Platform	Hyderabad
Rohan Das	Backend Engineer	Product Engineering	Chennai
Divya Menon	Security Analyst	Cybersecurity	Pune
Pooja V	AI & Data Science Engineer	AI Research	Chennai

4. Managers and Reporting Structure

Ananya Sharma manages the AI Research Department. Priya Nair and Pooja V report to Ananya Sharma.

Rahul Mehta manages the Data Engineering Department. Arjun Patel reports to Rahul Mehta.

Vikram Rao manages the Cloud Platform Department. Sneha Kapoor reports to Vikram Rao.

Meera Iyer manages Product Engineering projects. Rohan Das reports to Meera Iyer.

Karan Singh manages the Cybersecurity team. Divya Menon reports to Karan Singh.

5. Projects

Project	Lead	Departments Involved	Description
GraphMind	Ananya Sharma	AI Research; Data Engineering	Knowledge graph platform for enterprise intelligence
DataFlow	Rahul Mehta	Data Engineering; Cloud Platform	Scalable data ingestion and processing platform
CloudPulse	Vikram Rao	Cloud Platform; Cybersecurity	Cloud Platform Scalable data ingestion and processing platform
AITechERP	Meera Iyer	Product Engineering; Cybersecu	ityEnterprise resource planning application
SecureVision	Karan Singh	Cybersecurity; AI Research	AI-assisted security threat detection platform

6. Technologies

GraphMind uses Python, Neo4j-compatible graph concepts, ChromaDB, Ollama, and FastAPI.

DataFlow uses Python, Apache Spark, PostgreSQL, and Apache Airflow.

CloudPulse uses Microsoft Azure, Kubernetes, Prometheus, and Grafana.

AITechERP uses React, FastAPI, PostgreSQL, and Docker.

SecureVision uses Python, PyTorch, FastAPI, and Elasticsearch.

Pooja V contributes Python and AI/ML knowledge to the AI Research team and supports GraphMind-related development.

Several projects use Python and FastAPI, creating shared technology relationships across departments.

7. Locations

Location	Departments / Teams
Chennai	AI Research; Product Engineering
Bengaluru	Data Engineering
Hyderabad	Cloud Platform
Pune	Cybersecurity

8. Cross-Team Relationships

1. Ananya Sharma collaborates with Rahul Mehta on GraphMind.
2. Priya Nair works with Arjun Patel to prepare data for GraphMind.
3. Pooja V collaborates with Ananya Sharma on GraphMind and supports AI/ML development.
4. Pooja V works with Priya Nair on machine learning experiments for GraphMind.
5. GraphMind receives data from the DataFlow platform.
6. Rahul Mehta and Vikram Rao collaborate on the DataFlow cloud infrastructure.
7. CloudPulse provides monitoring data used by the Cloud Platform and Cybersecurity teams.
8. Karan Singh advises the AITechERP team on application security.

9. SecureVision combines AI Research expertise with Cybersecurity knowledge.
10. Priya Nair contributes machine learning models to SecureVision.
11. Rohan Das integrates FastAPI services into AITechERP.
12. Sneha Kapoor manages cloud deployment support for DataFlow.
13. Pooja V contributes to GraphMind using Python, FastAPI, ChromaDB, and Ollama.

9. Example GraphRAG Questions

• How is Rahul Mehta connected to the GraphMind project?

• Which technologies are shared by multiple projects?

• Which employees work in projects involving AI Research and Cybersecurity?

• What projects are connected to the Data Engineering department?

• How are GraphMind and DataFlow related?

• Which people are connected to projects in Chennai?

• What path connects Pooja V to GraphMind?

• How is Pooja V connected to Priya Nair?

• Which departments collaborate with the Cloud Platform team?

Note: This is a synthetic dataset created for learning and demonstrating GraphRAG concepts. It is not a real company's confidential information.
